SNOW AND ICE CONTROL PLAN

DEPARTMENT OF PUBLIC WORKS AND DEVELOPMENT
LEXINGTON-FAYETTE URBAN COUNTY GOVERNMENT
Winter of 2009 – 2010

INTRODUCTION

Snow and ice removal in Fayette County is a combined effort between the Department of Public Works and Development and the Kentucky Department of Highways (KYDOH). The Division of Streets, Roads and Forestry is responsible for snow and ice removal for more than 1100 lane miles of city and county roads. The state is responsible for plowing more than 500 lane miles of Federal, State, and County roads. It is often difficult for the public to distinguish between city and state roadways within Fayette County. For example, New Circle Road is a State-maintained road, while Man O War Boulevard is maintained by the city. The map in **Appendix 1** highlights the difference between City and State maintained roadways.

Every Fall, representatives from the Departments of Public Works and Development, Environmental Quality, General Services, Public Safety; the Divisions of Government Communications and Computer Services along with Fayette County Public Schools, LexTran, and the KYDOH (Kentucky Department of Highways) meet to review and update the Snow and Ice Control Plan for the upcoming winter season.

The Division of Streets, Roads & Forestry coordinates the long-range planning and equipment preparation for snow removal. The variety of conditions that can occur during the snow-and-ice season within Fayette County makes advance preparation rather difficult. These conditions consist of:

The rate and accumulation of snowfall, moisture content, presence of sleet and freezing rain, temperature variations - during and after the storm, wind velocity, time of day or night, storm duration, and intervals between storms all interact to make each event unique.

These various factors are considered when establishing procedures and protocols for snow-and-ice removal and when evaluating their effectiveness in minimizing a storm's impact on the community.

USEFUL TELEPHONE NUMBERS

These telephone numbers can provide helpful information during a snow emergency:

LFUCG

Streets, Roads & Forestry –

Contacts: Sam Williams, Albert Miller, Bill Osborne, Annette Cook
(Hours of Operation – 7:30 a.m. to 4:00 p.m.)

258-3451

311 – (After hours)

Water Quality –

Contacts: Rod Chervus, TJ Taylor, Chris Begley, Craig Prather, Randy Davis

425-2400

Traffic Engineering –

Contact: Brad Frazier

GETTING THE WORD OUT TO THE MEDIA & PUBLIC

Prior to the beginning of the snow season, a copy of the Snow and Ice Control Plan is available in the Office of Public Works and Development (9th floor of the Government Center) for the media to learn about notification and operating procedures.

Should conditions dictate that the Mayor or the Commissioner of Public Works and Development declares a snow emergency; the media will be notified by LFUCG's Division of Government Communications.

The LFUCG Traffic Management Center (TMC) also keeps the media notified of street conditions and traffic movement. The TMC sends information out continuously via the Internet, plus faxes to those without Internet access. Information goes to:

- 4 local television stations
- 22 radio stations covering 33 counties in Central Kentucky
- 5 radio stations along Interstate 75 (in emergencies)
- Kentucky State Police posts
- AAA
- Truck stops along the I-75, I-64 corridors

The TMC gathers traffic information from many sources: the computerized traffic signal control system, video surveillance cameras, LFUCG Police dispatch, State Police dispatch, State Department of Highways, AAA, Kentucky Utilities, local schools, LexTran, Bluegrass Airport, and the LFUCG's Divisions of Streets, Roads & Forestry, Government Communications, Engineering, and Water Quality.

The Traffic Management Center also gets information from the National Oceanic & Atmospheric Administration (NOAA), which is a weather band on a scanner that signals when weather conditions threaten to become severe.

The public can call the TRAFFIC HOTLINE at **258-3611** to hear traffic updates or check local road conditions on the TMC Web site listed below.

The public can also get information on accidents, lane blockages, and snow-and-ice trouble spots and road closures on the Crosstown Traffic Show, which is broadcast live from 6:30 a.m. to 8:30 a.m. weekday mornings on cable's GTV3.

GETTING THE WORD OUT TO THE MEDIA & PUBLIC (continued)

Want to find out where your street fits on the priority list for snow removal? The LFUCG's **WEB PAGE** lists all priority streets and snow emergency routes. Icy street conditions and snow emergency declarations are posted when appropriate.

Navigate to:

www.lfucg.com/streets/snow.asp or

www.lfucg.com/trafficinfo/index.asp (The Traffic Management Center).

WEATHER MONITORING

During the snow-and-ice season, the Division of Streets, Roads & Forestry continuously monitors the Weather Channel along with other in-house weather radar-tracking systems, which enables them to forecast an impending storm up to about 4 hours before it hits the area.

The weather-radar system tracks the wind direction, the velocity of the storm, and what type of precipitation (snow, rain, sleet, etc.) the storm is bringing. Streets, Roads & Forestry also relies on NOAA, and monitors local area media forecasts.

NINE CONDITIONS ROAD ADVISORY LIST

The nine conditions road advisory list was developed in order to systematically advise the public of road conditions, expected travel time and, when necessary, emergency procedures that must be followed.

Nine Conditions Road Advisory List

- | | |
|--------------------|---|
| Condition 1 | Travel unrestricted on all roads with normal caution. Snow and ice are absent from roadways. No effect on commuting time. |
| Condition 2 | Travel unrestricted on all main roads. Side roads and subdivision streets could have occasional snow or ice. Use extra caution when using side streets. Minimum effect on commuting time for residents. |
| Condition 3 | Travel unrestricted on all main roads with occasional snow or ice. Conditions are poor on subdivision and secondary streets with frequent snow or ice that could result in loss of traction. Use extra caution in all travel. Commuting time may be affected. |
| Condition 4 | Expect moderately hazardous snow and/or ice on most roads with reduction in ability to travel. Subdivision streets are covered with sheets of ice and are extremely hazardous. Avoid unnecessary trips. Commuting time will be doubled. |
| Condition 5 | Expect moderately hazardous snow and/or ice on most primary snow routes with reduction in ability to travel. Subdivision streets are covered with sheets of ice and are extremely hazardous. Avoid unnecessary trips. Commuting time will be doubled. |
| Condition 6 | All roads are very slick and hazardous. Serious reduction in ability to travel. Travel should be avoided if at all possible and then only if vehicle has snow tires or chains. Commuting time will be doubled. |
| Condition 7 | A STAGE "1" snow emergency exists and has been declared by the Mayor. Conditions warrant snow plowing. Parking is prohibited on streets and thoroughfares designated as snow emergency routes. Specific condition reports will be issued for the duration of the emergency. Commuting time will be severely affected. All unnecessary travel should be avoided. |
| Condition 8 | A STAGE "2" snow emergency exists and has been declared by the Mayor. Conditions warrant snow plowing. Parking is prohibited on streets and thoroughfares designated as snow emergency routes, plus parking restrictions on secondary residential streets. Commuting time will be severely affected. All unnecessary travel should be avoided. |
| Condition 9 | A STAGE "3" snow emergency exists and has been declared by the Mayor. Conditions warrant snow plowing. Parking is prohibited on streets and thoroughfares designated as snow emergency routes. Specific condition reports will be issued for the duration of the emergency. Commuting time will be severely affected. Travel is prohibited except for emergencies and/or essential activities and vehicles with four-wheel drive, snow tires and/or chains. |

When conditions become so severe that traffic flow and parking must be restricted for snow plowing and other snow-removal efforts, the Mayor will declare a snow emergency. A snow emergency consists of 3 stages:

- Stage 1:** No parking will be permitted on designated snow emergency routes.
- Stage 2:** No parking permitted on designated snow emergency routes plus parking restrictions on residential roads. Parking permitted on alternate sides of the street - even house numbered side on even numbered days and odd numbered side on odd numbered days.
- Stage 3:** No travel permitted on designated snow emergency routes unless vehicle is equipped with snow tires, tire chains, or four-wheel drive, or is an emergency vehicle or vehicle approved by the Mayor.

SNOW EMERGENCY ROUTES

The Urban County Government has designated, with appropriate signs, approximately 82 miles of roadway as Snow Emergency Routes. These are roadways that have a high traffic volume and/or shoulders that are inadequate to accommodate disabled vehicles.

Disabled or parked vehicles along these roadways can cause problems when snow plowing is in progress. A complete listing of the designated snow emergency routes is found in **Appendix 2**.

During a snow emergency, the Division of Police can remove, or have removed, a vehicle from an emergency route to facilitate traffic movement and snow-removal efforts. This may occur:

- When the vehicle is parked in an area declared a Stage 1, 2, or 3 snow emergency.
- When the vehicle is stalled or disabled on the normally traveled portion of any public roadway and the owner is not attempting to remove the vehicle.

Vehicles are moved to an area designated by the Urban County Government. Car owners can retrieve their cars by calling the Police reports desk at **258-3563**. The Division of Traffic Engineering checks snow emergency route signs annually. Missing, damaged or unreadable signs are replaced.

TREATING THE ROADS

Pre-treating the roads with salt brine, salt, or a mixture of salt and calcium chloride is the first step in fighting a snowstorm. The LFUCG stockpiles a minimum of 3,000 gallons of salt brine, 6,000 tons of rock salt (sodium chloride) and approximately 5,000 gallons of calcium chloride to begin the snow season.

Rock salt is the most widely used de-icing agent in the United States because of its cost and effectiveness. When the temperature is above 25 degrees, salt can melt several inches of snow and prevent or reduce the bonding of compacted snow to the pavement surface.

Salt is less effective at temperatures below 25 degrees and/or when traffic volumes are too light to activate the chemicals. For lower temperatures, a ratio of 9 gallons of liquid calcium chloride to every ton of sodium chloride (salt) is used to treat the pavement. The calcium chloride reacts with salt to create melting at temperatures to 20 degrees below zero.

Depending on the expected conditions, the Division of Streets, Roads & Forestry will be proactive and apply salt brine to streets to try to keep ice and snow from bonding to the pavement.

Streets, Roads & Forestry have two hand-held pavement thermometers and two truck-mounted infrared thermometers to test the temperature of the pavement. The temperature of the pavement helps them determine which method of snow-and-ice control to use.

A fog-and-ice-detection system, which detects the amount of moisture present on the pavement and determines the exact point at which it freezes, is in place on the Clays Ferry bridge. When freezing begins, a signal is sent to the Kentucky Transportation Cabinet in Frankfort and to the LFUCG's Traffic Management Center. The Division of Streets, Roads & Forestry is then notified that freezing has begun at Clays Ferry, and they can respond accordingly as freezing begins on Lexington's streets. In most cases, when snow reaches a depth of one inch, snow plowing is initiated.

STREETS PLOWED BY PRIORITY

The priority plan for snow removal was developed by identifying a basic system of roads essential to the continuation of traffic movement. While developing this plan, the realistic capabilities of the Lexington-Fayette Urban County Government, such as equipment and personnel, were kept in mind. Priority routes were developed by considering traffic volume, access to public transportation, access to emergency services, and access to primary school bus routes.

Priority streets are defined as follows: Priority 1 streets are the primary arteries in and out of the city, such as Main Street, Nicholasville Road, Richmond Road, etc. Priority 2 streets are the major connecting streets, such as Red Mile Road and Loudon Avenue. Priority 3's are the school bus routes, and Priority 4's are the primary arteries in subdivisions, which can get residents to the main roads.

As of November 2008, there are 905 lane miles of priority streets in the city. (Lane miles are the number of lanes along a road multiplied by the distance.)

This priority plan is divided into 9 areas of responsibility for work crews. Each area is assigned to a supervisor who is given trucks, plows, and spreaders. Crews start with priority 1 streets and proceed through all of the priority streets. When these streets are plowed one time, the crews return, by priority, to the streets that need to be re-plowed. While crews are plowing streets in the urbanized area of Fayette County, other crews are also plowing county roads. (See North and South County roads in **Appendix 4**.) Only when all the streets listed on the "Snow & Ice Control Priority Streets" in **Appendix 1** are totally clear does Streets, Roads & Forestry have the manpower and equipment to plow non-priority streets. Removal efforts do continue until safety hazards caused by a snow or ice emergency have been eliminated.

The amount of snow, the type of snow and/or ice, and the duration of the storm affect the time it takes to complete work on each priority street. Therefore, a specific completion time cannot be given.

BRIDGES, HILLS & INTERSECTIONS

Because of the increased danger to the public by snow and ice on bridges, hills, and intersections, these are given special attention. Many of these are located on priority routes, so they are handled at the same time as general salting and plowing. At the beginning of the snowfall, small salt trucks are sent to treat bridges that are located in the downtown area, or adjacent to it. Crews check each bridge, hill, and intersection periodically in case snow or ice has built up again.

Some of the bridges and hills are listed below.

BRIDGES and HILLS (Areas likely to freeze first)

RURAL AREA PLAN

The rural area snow plan designates snow removal responsibilities to the Lexington-Fayette Urban County Government and the Kentucky Department of Highways. Currently, the LFUCG is responsible for salting and plowing 115 miles (230 lane miles) of rural roadway, while the KYDOH provides snow removal for approximately 500+ miles of Fayette County's roadways.

The LFUCG's rural snow plan divides the county into two sections that are separated by Leestown Rd./Main St./Richmond Rd. The direction the snowfall is moving dictates which sections of the county crews begin plowing first. All designated roads are basically of equal priority, with the exception of hilly areas near the Kentucky River. **Appendix 4** provides a complete listing of the county roadways that are the responsibility of the LFUCG.

TRANSPORTATION CABINET KENTUCKY DEPARTMENT OF HIGHWAYS (KYDOH) RESPONSIBILITIES AND PROCEDURES

Because of the joint responsibility for roadways in Fayette County between the KYDOH and the Lexington-Fayette Urban County Government, it is imperative to include KYDOH in the countywide snow plan. **Appendix 5** contains a map of state and county routes and whether the state or city plows them, information on KYDOH, and a list of state-maintained roads by priority.

The KYDOH contracts out most of the work it does on I-75, I-64, and New Circle Road, so its crews can concentrate on keeping the other routes in Fayette County salted and plowed. To help with response time, the state calls the Lexington Division of Police when snow moves into the counties within 30 miles of Fayette County. A copy of the KYDOH's ice and snow removal plan is available at the Division of Streets, Roads & Forestry.

HOURS OF OPERATION

During the snow season, Streets, Roads & Forestry's supervisors are on call 24 hours a day, 7 days a week, on a rotating basis. If the Division of Police determines that slick or icy spots are developing on roadways, they alert Streets, Roads & Forestry's on-call personnel and salt trucks are dispatched to the trouble spots. In a snow emergency, crews from Streets, Roads & Forestry and Sanitary Sewers work 12-hour shifts around-the-clock until the priority roads are cleared.

HELP FROM OTHER DIVISIONS

The Division of Water and Air Quality clears one-fifth of the lane miles, using its personnel with 6 dump trucks and two 4x4 pickup trucks. Also, the Divisions of Waste Management, Traffic Engineering, and Engineering may provide personnel. Some normal operations of these divisions, such as garbage collection, can be suspended or curtailed as equipment and personnel are reallocated to the snow-fighting effort.

The Division of Fleet Services puts its staff on a 24-hours-a-day, 7-days-a-week schedule in severe weather to service and repair snow equipment. Personnel from the Division of Engineering are often activated to unclog storm-water basins and maintain storm-water sewers during snow emergencies.

LFUCG EQUIPMENT

The Urban County Government has on hand for the 2008-2009 snow season a total of 49 trucks with plows; this consists of 32 dump trucks, 8 super-duty trucks, and (6) 4x4 pickup trucks. Additionally, there is 1 front-end loader, two skid loaders, one grader, and three backhoes.

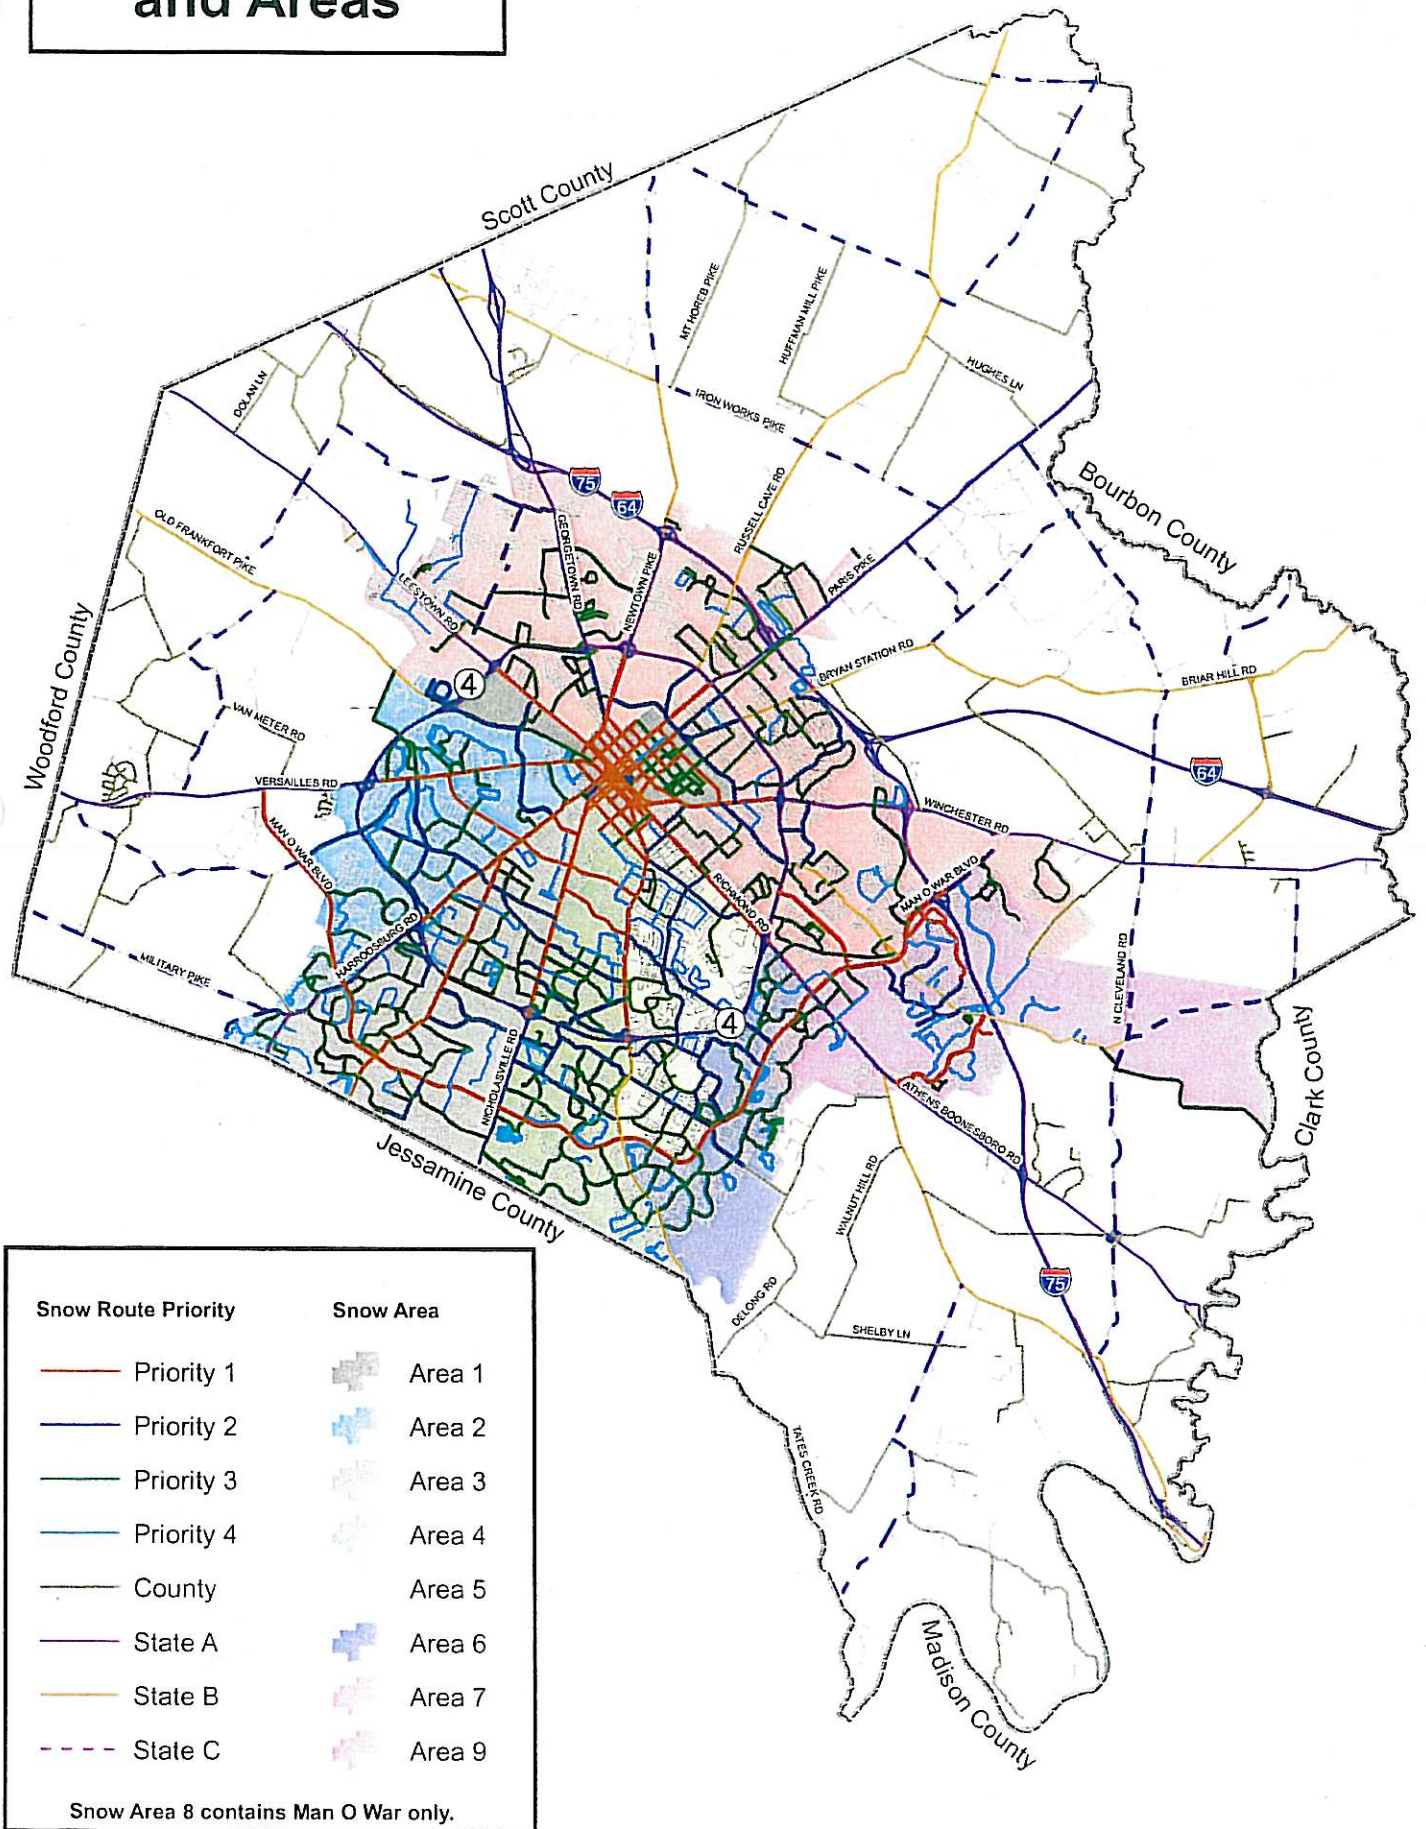

LFUCG GARBAGE COLLECTION POLICY IN SNOW OR ICE EVENTS

Municipal regulations and public health protection require that the Division of Waste Management provide garbage, recyclables, and yard waste collection regardless of weather conditions. The exception is in emergency situations such as heavy snow and ice when management, for the safety of its employees and the public, can suspend all collections to keep its heavy vehicles off the streets until road conditions improve. When collections are temporarily suspended, LexCall and the LFUCG's Government Communications office are notified to provide information to the public.

APPENDIX 3

Code of Ordinances
Lexington-Fayette Urban County Government

Chapter 18B SNOW EMERGENCIES*

*Cross reference(s) -- Streets and sidewalks, generally -- chapter 17; traffic, generally -- chapter 18.

Sec. 18B-1. Definitions.

The following words and phrases when used in this chapter shall, for the purpose of this chapter, have the meanings respectively ascribed to them in this section:

- (1) Snow emergency route shall mean any public street, highway or thoroughfare designated by the urban county Division of Traffic Engineering as a snow emergency route and posted with special signs properly identifying it as such a route. The special signs on the route shall be posted at intervals not exceeding 1,000 feet and shall be posted on both sides of the route.
- (2) Secondary street shall mean any public street, highway or thoroughfare which is not designated and signed as a "Snow Emergency Route."

(Ord. No. 274-78, Sec. 1, 11-7-78)

Sec. 18B-2. Parking -- Snow emergency routes.

No vehicle is authorized to park in any public way designated as a snow emergency route when a Stage 3 snow emergency has been declared by the mayor.

(Ord. No. 274-78, Sec. 1, 11-7-78)

Sec. 18B-3. Same -- Secondary routes.

No vehicle is authorized to park on any public way defined by section 18B-1 as a secondary street when a Stage 2 snow emergency has been declared by the mayor except:

- (1) On the even-numbered side of the secondary street from 8:00 a.m., prevailing time, on any even-numbered day until 8:00 a.m., prevailing time, the following day; and
- (2) On the odd-numbered side of the secondary street from 8:00 a.m., prevailing time, of any odd-numbered day, until 8:00 a.m., prevailing time, the following day.

(Ord. No. 274-78, Sec. 1, 11-7-78)

Sec. 18B-4. Travel on snow emergency routes.

No vehicle is authorized to travel on any public way designated as a snow emergency route when a Stage 3 emergency has been declared by the mayor unless such vehicle is:

- (1) Equipped with snow tires; or
- (2) Equipped with snow chains; or
- (3) Equipped with 4-wheel drive; or
- (4) An emergency vehicle as defined by Kentucky Revised Statutes; or
- (5) A vehicle approved by the mayor for travel during the snow emergency.

(Ord. No. 274-78, Sec. 1, 11-7-78)

Sec. 18B-5. Snow emergency declaration.

Whenever the mayor decides, on the basis of falling snow, sleet or rain, or on the basis of a firm forecast by the U.S. Weather Bureau of snow, sleet or freezing rain, that weather conditions will make it necessary that motor vehicle traffic be expedited and that parking on public ways within the urban county be prohibited or restricted for snow plowing or other purposes, the mayor, with the approval of the commissioner of highways of the Commonwealth of Kentucky, shall put into effect, as necessary, parking prohibitions on parts or all of snow emergency routes (Stage 1 emergency), parking restrictions on public ways designated as snow emergency routes (Stage 2 emergency), and travel restrictions on public ways designated as snow emergency routes (Stage 3 emergency), by declaring and announcing a snow emergency in the manner prescribed by this chapter. The mayor shall cause each snow emergency declaration made by him/her pursuant to this chapter to be publicly announced by means of broadcast or telecast from radio and television stations with a normal operating range covering the urban county, and he/she may cause such declaration to be further announced in newspapers of general circulation within the urban county. Each announcement shall be made between the hours of 6:00 a.m. and 11:00 p.m. and shall describe the action taken by the mayor, including the time the snow emergency and resulting vehicular parking or travel restrictions became or will become effective, which shall be as specified by the mayor, but not less than one hour after the snow emergency is first publicly announced, and further shall specify the extent of vehicular parking or travel restrictions in effect. The mayor shall make or cause to be made a record of each time and date when any such declaration is announced to the public in accordance with this section.

(Ord. No. 274-78, Sec. 1, 11-7-78)

Sec. 18B-6. Emergency removal of parked or disabled vehicles.

During any snow emergency declared by the mayor, the division of police is authorized to remove, or have removed, a vehicle from a public way to the nearest place of safety (including another place on a public way), or to a place designated or maintained by the urban county government, when:

- (1) The vehicle is parked on a public way designated as a snow emergency route while a parking prohibition is in effect;
- (2) The vehicle is parked in violation of section 18B-3 above, and is interfering with or about to interfere with snow removal operations;
- (3) The vehicle is stalled or disabled on the normally traveled portion of any public way, when the owner or operator thereof is not promptly pursuing the removal of such vehicle.

The removal of vehicles as authorized herein shall be in accordance with this Code and is supplemental to any other provision of law granting the division of police authority to remove vehicles.

(Ord. No. 274-78, Sec. 1, 11-78)

Sec. 18B-7. Penalties.

Every person convicted of a violation of any provision of this chapter shall be punished by a fine of not more than \$50 or less than \$10.

(Ord. No. 274-78, Sec. 1, 11-78)

Sec. 18B-8. Other regulations.

Nothing in this chapter shall be construed to permit parking at any time or place where it is forbidden by any other section of this Code.

(Ord. No. 274-78, Sec. 1, 11-78)

APPENDIX 6

Park Maintenance

Snow Removal Plan

The Division of Parks and Recreation is responsible for the removal of snow and ice from parks and government properties and sidewalks when conditions are warranted. The specific responsibilities are assigned to the maintenance sections of North Base and Old Frankfort Pike.

This document addresses the specific plan of responsibility for each section.

Area of Responsibility

Old Frankfort Pike

This section is responsible for certain government properties, parks, roadways into parks, parking lots, sidewalks, and sidewalks on bridges.

North Base

This section is responsible for parking lots, walkways, and building entrances at Parks and Recreation offices and locations.

Decision Making Criteria

The snow removal decisions will be made by the Public Service Supervisor, Sr. at each section with input from the Public Service Supervisors, and in conjunction with the Maintenance Superintendent.

The snow removal crews will arrive at the time directed by the Public Service Supervisor, Seniors. Generally, employees will flex their work hours; however in some instances overtime may be necessary. When possible, areas will be pre-salted.

It may become necessary to utilize contractors when significant snowfall amounts occur.

Additional Notes

1. The streets listed below are technically the responsibility of Parks, however, Streets, Roads and Forestry has agreed to clear them.

- Masterson Station Park –
Ruffian Way
Shamrock Lane
- Shillito Park –
Shillito Park Road
Brunswick Road

2. Division of Fire will handle the Fire Training Center parking lot, but may contact Parks for assistance if needed.

Old Frankfort Pike Section

- Phase I will be done immediately.
- Phase II & III will only be done when instructed by supervisor.

Phase I**Parking Lot Locations and Assignments (# of parking spaces/sq. ft)**

(Garrette's Crews)	
Crew #1	Crew #2
Senior Citizens Center (134/48,400)	Police Roll Call – Old Frankfort Pike (32/13,190)
Police Roll Call – Goodwin Drive (42/48,400)	Family Care Center Complex (305/138,750)
Central Kentucky Training Center (42/17,550)	Versailles Road Government Campus (90/123,030)
Black & Williams Center (40/27,500)	Police Roll Call – Centre Parkway (40/22,500)
1555 Old Frankfort Pike (208/81,810)	
Recycling Center (20/180,000)	

Contractor Utilization Plan

When contractors' assistance was required in the winter of 2008-2009, the areas of responsibility were as follows:

1. Total Lawn Care - Senior Citizens Center, Police Roll Call – Centre Parkway, Police Roll Call – Goodwin Drive, Central Kentucky Training Center
2. Lexington Turf Maintenance - Family Care Center Complex
3. Happy's General Contracting - Police Roll Call – Old Frankfort Pike, Versailles Road Government Campus, Black & Williams Center
4. Old Frankfort Pike (Garrette's Crew) - 1555 Old Frankfort Pike, Recycling Center

Building and Sidewalk Locations and Assignments (Urey Washington's Crews)

Crew 1	Crew 2	Crew 3
Police Roll Call – Goodwin Drive	Police Roll Call – Old Frankfort Pike	Police Roll Call – Centre Parkway
Carnegie Center	Family Care Center Complex	Senior Citizens Center
Old Courthouse Museum		Black & Williams Center
Coroner's Office		Old Frankfort Pike – 1555

Phase II

All Equal Priority Bridge Sidewalks

Centre Parkway
Henry Clay Blvd
Loudon Avenue
Seventh Street
Virginia Avenue
Jefferson Street
Manchester Street ramp
High Street and Pine Street
South Broadway underpass
West Main Street
Leestown Road at Clyde Street

Phase III
